Projects

model findr, Fullstack Software Engineer [live](#) | [github](#)

San Francisco, CA 2014-2015

Flickr style social network, connecting photographers to models.

- Integrated Backbone front end to enable seamless navigation for a better user interface and overall experience.
- Implemented jQuery autocomplete search bar in order to discover other users by either city or username.
- Established intuitive image gallery design, using dynamic resizing of images to nicely fit on the screen.
- Utilizes a cloud storage API for images, allowing users to upload images and share them.

Tetris, Javascript Developer [live](#) | [github](#)

San Francisco, CA 2015

Classic arcade game rebuilt in Javascript from scratch

- Refactored Javascript source code in order to relocate components at a 20% faster and more fluid pace.
- Developed a point award system for players, in order to increase competitiveness and user retention.
- Implemented original game rules and representation so that the interaction has a classic feel to it.

Rails Lite, Ruby Developer [github](#)

San Francisco, CA 2015

Ruby application with a MVC framework, derivative of Rails

- Incorporates WEBrick Ruby library to handle HTTP requests and populate responses quickly.
- Operates ERB to provide templating, allowing easy use of Ruby code within HTML documents.
- Allows the use of storing cookies to send and read data in the request/response cycle.

Technical Skills

Ruby, Rails, Javascript, BackboneJS, jQuery, git, HTML, CSS, SQL, RSpec, TDD

Experience

San Leandro Taxi Cab/Airport Limousine, Transportation, Co-founder

San Leandro, CA 2010-present

- Founded a Taxi/Limousine/medical transportation family company servicing thousands of clients a year.
- Utilized SEO, social media, and booking by website to increase volume of calls by 30% after implementation.
- Introduced low-emission vehicles reducing carbon-footprint saving 20k/vehicle in lowered energy consumption.
- Successfully closed a contract with local RV companies that generated 30-40k of revenue per contract.
